**Christian Science Churches**  
"Spirit" will be the subject of the Lesson Sermon in all Churches of Christ Scientist on Sunday, February 11.  
The Golden Text is from Ephesians 5:9, "The fruit of the Spirit is in all goodness and righteousness and truth."  
The Lesson Sermon comprises quotations from the Bible and from the Christian Science textbook, "Science and Health with Key to the Scriptures," by Mary Baker Eddy.  
One of the Bible citations reads: "I have called upon thee, for thou wilt hear me, O God: incline thine ear unto me, and hear my speech. As for me, I will behold thy face in righteousness: I shall be satisfied, when I awake, with thy likeness" (Psalms 17:1-15).  
Among the selections from the Christian Science textbook is the following: "When we realize that Life is Spirit, never in nor of matter, this understanding will expand into self-completeness, finding all in God, good, and seeing no other consciousness. Spiritual living and blessedness are the only evidences, by which we can recognize true existence and feel the unshakable peace which comes from an all-absorbing spiritual love" (p. 264).

Why not have your flock culled and wormed now while they are just coming through the winter, so as to have them in shape when they start. I cull them and give them a worm pill guaranteed to get the tape, round and pin worms for the small cost of one cent each, or about the price of an egg. And you will be surprised how many more eggs a hen will lay that is free from worms.

**The Lawyer and Editor**  
Here's what a lawyer says about an editor:  
"An editor is a man who writes more and more about other people's affairs, concerning which he has had much scattered information aggregating nothing, thereby eliciting comment from people who know less about the things he writes than does the editor, until finally he gets up all the combined ignorance of the community upon the subject."

Here's what an editor says about the lawyer:  
"A lawyer is a man who knows a great deal about a very little, and keeps on knowing less and less about more and more until finally he knows practically everything about nothing."

**Fifth and Sixth**  
We are enjoying an interesting studying in construction work this week of model farm buildings of construction paper. It involves much artistic taste and accuracy in measurements. Every effort is being made to construct on a scale allowing 8 ft. to 1 in. In a few weeks we hope to have an exhibit worth coming to see.

Absences this week were: Cyrus Finley 5 days, Darrel Smith 1 day  
Visitors this week: Mrs. Lamond and Mrs. M. E. Stewart.  
Half of our pupils are members of the A club, (14) and this marks a record for us. Perhaps the fact that only members of the A club are entitled to work on the farm plots has something to do with this.  
We want the parents to understand that we are all working on declamatory pieces. We have 23 pupils in the room and each are supposed to master one selection. It would be a great help if each would read over or say their piece at least once each evening at home. Memorization is the first big step, in Declamatory work and it matters little who hears the practice work just so the pupil reads over or speaks it overs from beginning to end once each day. Please have your boy or girl speak his piece at home each evening.

**Seventh and Eighth**  
Visitors were Norma Jean and Frances Overman.  
Evelyn Cochran is having the measles.
